Sharabu Eswarachari

eswarachari102@gmail.com | +91 9515240481 | linkedin.com/in/eswara-chari-51553322a | github.com/seswarachari

PROFESSIONAL SUMMARY

Cybersecurity graduate with hands-on experience in SOC operations, security monitoring, SIEM alert triage, log analysis, threat detection, incident investigation, and threat hunting. Skilled in analyzing security events, identifying IOCs, and investigating suspicious activity through practical SOC labs and real-world security projects.

GLOBAL CERTIFICATIONS

- **CompTIA CySA+** (Cybersecurity Analyst+) | CS0-003 — *Credly Verified*
- **CompTIA Security+** | SY0-701 — *Credly Verified*
- **Google Cybersecurity Professional Certificate** — *Coursera Verified*

TECHNICAL SKILLS

SOC Operations: Security Monitoring, SIEM Alert Triage, Incident Investigation, Threat Hunting, Incident Response
SIEM & XDR: Splunk (SPL), Microsoft Sentinel (KQL), Wazuh, Elastic Stack (ELK), Stellar Cyber Open XDR, Windows Event Logs, Sysmon
Network Security: Wireshark, Zeek, Snort, Nmap | **Vulnerability Assessment:** OpenVAS, Nikto
Threat Intelligence: YARA, VirusTotal, Maltego (OSINT) | **Malware Dynamic Analysis:** Process Explorer, Any.Run, Procmon, Volatility 3
Programming: Python, Bash | **Web Security:** Burp Suite
Frameworks & Compliance: MITRE ATT&CK, NIST Cybersecurity Framework (CSF), NIST SP 800-61, GDPR, HIPAA

PROFESSIONAL EXPERIENCE

Sure ProED — June 2025 – Dec 2025
Cyber Security Intern — *Remote*

- Monitored and analyzed security events using Splunk SIEM in a SOC environment.
- Performed log analysis, vulnerability assessments, and IDS/IPS alert triage.
- Assisted with incident response, security monitoring, and threat detection.

Kriya NextWealth Private Limited — Aug 2022 – Dec 2022
Data Processing Associate (Intern) — *On-Site*

- Supported AI/CV projects by annotating and validating 2D/3D LiDAR datasets.
- Processed point cloud, camera, and sensor data for autonomous perception systems, ensuring high dataset quality.

PROJECTS

IoT Malware Classification Using Ensemble Learning & DNN | *Python, Streamlit*

- Developed an AI-based IoT malware detection system using the CICIoT2023 dataset.
- Built an ensemble voting classifier achieving 92.27% accuracy in detecting DDoS, DoS, Mirai, and benign traffic.
- Created a Streamlit web application for real-time network traffic analysis and interactive visualization.

SIEM Detection Engineering Lab | *Wazuh, Sysmon, Python*

- Architected a Wazuh-based SIEM pipeline to monitor Windows endpoints, developing custom XML detection rules mapped to MITRE ATT&CK.
- Simulated APT behaviors using Atomic Red Team to validate alerts, and automated JSON log extraction into reports.

Automated Phishing Analysis Sandbox | *Python, Email Security*

- Built a static-analysis triage engine to detect phishing emails using heuristic rules and Machine Learning.
- Trained a TF-IDF text classifier to identify semantic social engineering patterns with a 0% FPR against legitimate emails.

PRACTICAL SECURITY LABS & SIMULATIONS

LetsDefend — SOC Analyst Learning Path: Completed hands-on SOC training in SIEM alert triage, Security Event Correlation, EDR analysis, phishing analysis, IOC extraction and enrichment, network log analysis, malware analysis, incident response lifecycle, Incident Response Playbooks, Cyber Kill Chain, IDS/IPS, cyber threat intelligence (CTI), and Splunk fundamentals.

Stellar Cyber — SOC Analyst Associate: Completed Open XDR training focused on alert and case management, Attack Graph analysis, Open XDR investigations, Root Cause Analysis (RCA), credential dumping (Mimikatz), PowerShell/LOLBins detection, lateral movement analysis, Incident Escalation, Security Documentation & Reporting, and security automation workflows.

PortSwigger Web Security Academy: Completed **95+ Practitioner Labs** using Burp Suite to identify, exploit, and remediate high-impact vulnerabilities—including **SQLi**, **XSS**, **SSRF**, **Broken Access Control**, and **API Security flaws**—authoring technical remediation reports with exploit evidence.

EDUCATION

Sri Venkateswara College of Engineering — Tirupati, AP
B.Tech in Cyber Security | CGPA: 8.0 — *Sep 2023 – May 2026*

Sri Venkateswara College of Engineering and Technology — Chittoor, AP
Diploma in Computer Science | Percentage: 69% — *Sep 2020 – May 2023*
